

# 1/8 Pocher Alfa Romeo Master Decal Upgrade Kit Suits All Versions

Thank you for purchasing the 1/8 Pocher Alfa Romeo Master Decal Upgrade Kit from Lead-Foot Models.

This kit includes a number of decals to allow you to model different versions of each of the Alfa Romeos' released by Pocher. In addition, the kit has been upgraded with additional items such as "Aged Images" and other sponsor type logos and flags to add extra authenticity as desired.

As seems typical at the time, there were variations in the factory placement of the data plates on the prototype vehicles therefore, we suggest you identify the vehicle you wish to replicate, and apply the relevant decals as required.

To assist you to be able to replicate a wide variety of vehicle versions, we have also included several different types of some decals, as well as some extra items should you experience difficulty in the application.

Directions: Cut closely around each decal image and soak in luke-warm water. DO NOT leave in the water until the film separates as this can cause installation issues later. Usually around 15 to 20 seconds is enough. Any air bubbles can be gently rolled out with a cotton tip. The decals can also be sealed with clear of your choice to secure further in place.
